

Filsafat Ilmu dan Arah Pengembangan Arsip

Filsafat ilmu pengetahuan memiliki tiga aspek :

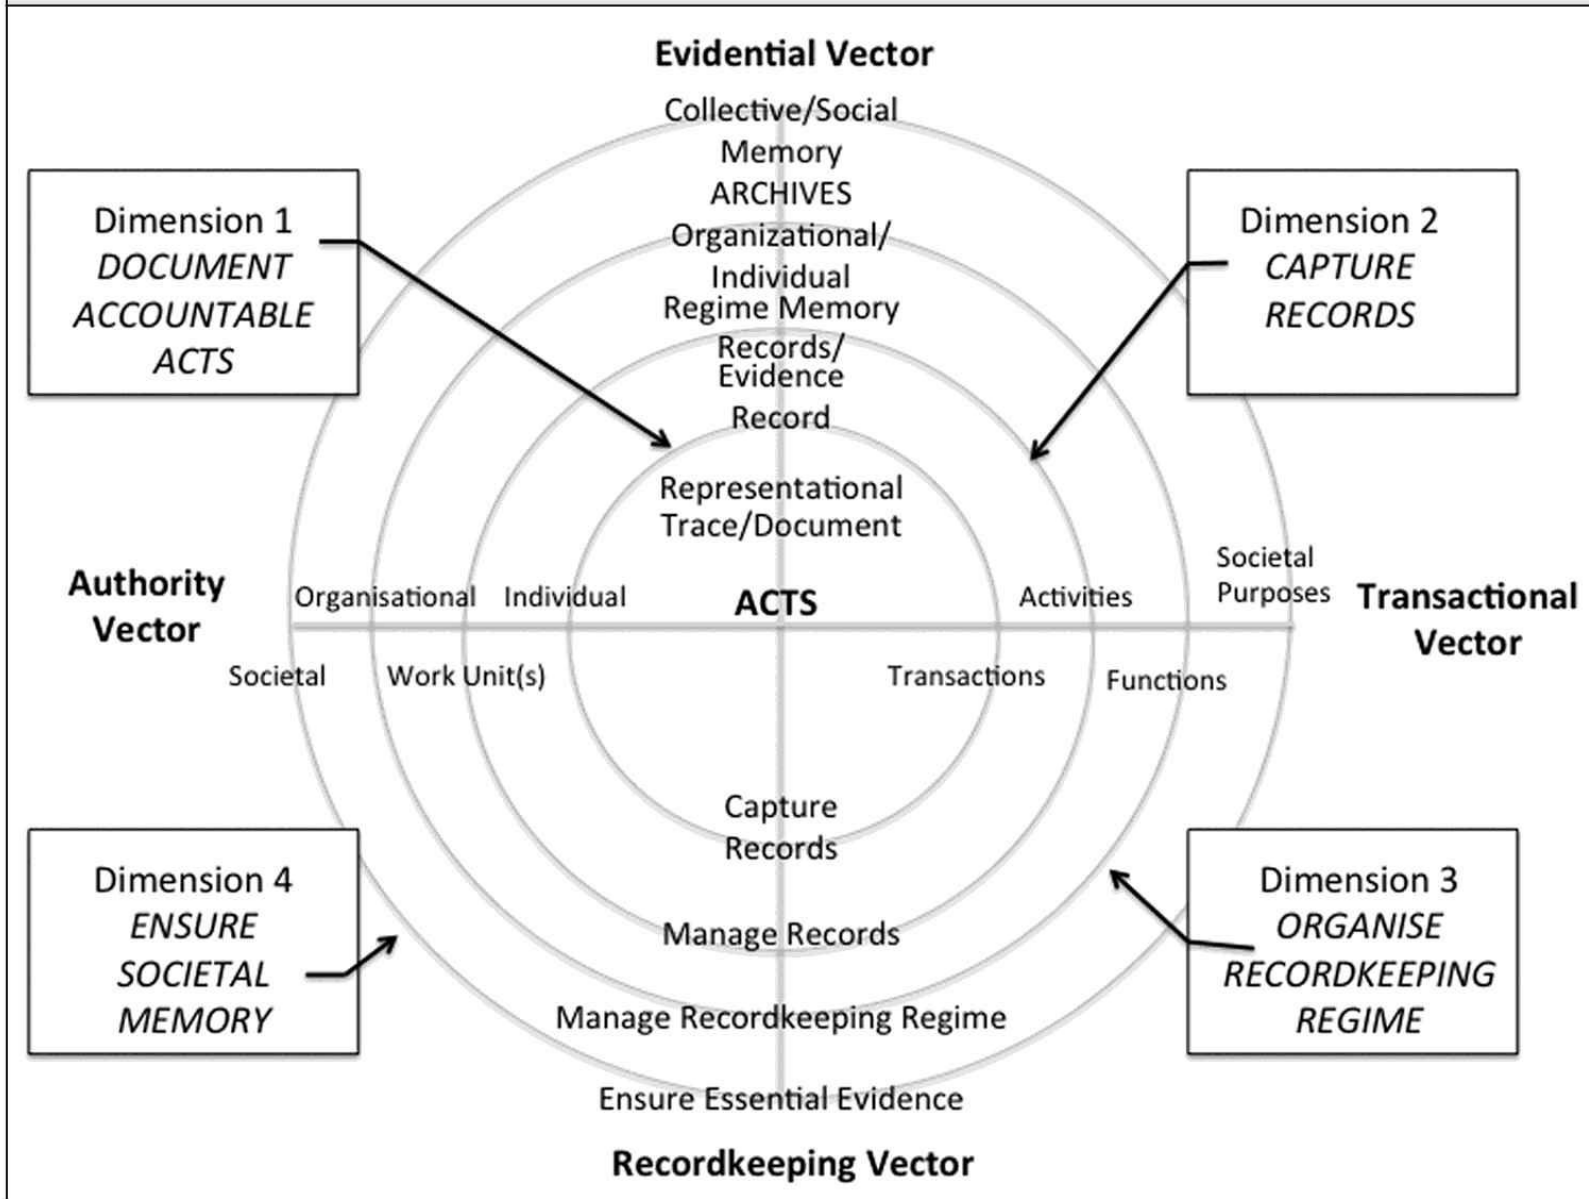

- ontologi,
- epistemologi
- aksiologi pada arsip merupakan satu jalan bagi pemecahan masalah nasional

- 
- Ontologi, arsip mengandung ajaran dan nilai-nilai, seperti membangun sikap saling menghormati satu sama lain;
 - Epistemologi, arsip merupakan sumber pengetahuan dan konsep-konsep kepemilikan nasional yang menjadi pedoman bagi kehidupan manusia Indonesia;
 - Axiologi, nilai arsip memberikan kontribusi dalam kehidupan masyarakat Indonesia melalui nilai kesederhanaan yang terkandung di dalam arsip menuju keadilan sosial dan kemanusiaan

RECORDS CONTINUUM

- concept of “record” inclusive of records of continuing value (archives) stresses their use for transactional, evidentiary, and memory purposes, and unifies approaches to archives/recordkeeping, whether records are kept for a split second or a millennium.
- There is a focus on records as logical rather than physical entities, regardless of whether they are in paper or electronic form.
- Institutionalization of the recordkeeping profession’s role requires a particular emphasis on the need to integrate recordkeeping into business and societal processes and purposes.
- Archival science is the foundation for organizing knowledge about recordkeeping. Such knowledge is revisable but can be structured and explored in terms of the operation of principles for action in the past, the present, and the future.

DIMENSI 4

S1 ARSIP

- a. Menguasai konsepsi arsip, rasionalitas dan paradigma arsip.
- b. Menelaah ulang dan menginterpretasi sistem arsip secara menyeluruh melalui pendekatan inter dan multi disiplin
- c. Mengaplikasikan dan menginterpretasi nilai-nilai etika dalam penelitian dan praktik
