

Name: Statistics					
module/course code	Student workload	Credits (ECTS)	Semester	Frequency	Duration
IAP4139	510 (minutes/week)	4.53 ECTS	III	Odd Semester	1x per semester
	Types of courses: Tutorial/Lecture/ Response	Contact hours: 150 minutes/week		Independent study: 360 minutes/week	Class size X students: 30 Students (S1)
1	Prerequisites for participation -				
2	Learning outcomes 1. Understand the basics of descriptive statistics and inductive/inductive statistics 2. Mastering the application of statistical calculation techniques and able to conclude the results of the analysis 3. Able to distinguish statistics from qualitative and quantitative data 4. Able to describe the conclusions from the results of the study 5. Mastering the use of software for statistics, SPSS, AMOS, GeSCA, etc. 6. Able to apply non-parametric data				
3	Description Studying the basic concepts of Statistics including Descriptive Statistics, Inferential Statistics, and various types of statistical tests linked to Parametric Tests and Non-Parametric Tests. Including Statistics practicum (1 time before middle semester examination and 2x after middle semester examination / before final examination of semester)				
4	Subject aims/Content: 1. Introduction 2. Fundamentals of Statistics 3. Measures of Central Tendency 4. Sizes of Dispersion 5. Other Measurements of Skewness & Kurtosis 6. Odds (Probability) 7. Distribution of Opportunities 8. Middle Semester Examination 9. Estimation (Estimator for Large Samples and Small Samples) 10. Hypothesis Testing 11. ANOVA (Analysis of Variance) 12. Simple Correlations 13. Simple Linear Regression 14. Multiple Correlation and Regression (Multiple Correlation and Regression) 15. Path Analysis 16. Final Examination of Semester				
5	Teaching methods lectures, discussions				
6	Assessment methods: assignments, Mid-Term Exam, Final-Term Exam, quizzes,
