Name: Governing Information Technology					
module/course code: IAB92003	Student workload: 340 Minutes/Week	Credits (ECTS): 3.02 ECTS	Semester 1	Frequency Odd Semester	Duration 1x / Semester
Types of courses: Tutorial/Lecture/ Response		Contact hours: 100 minutes/week		Independent study 240 minutes/week	Class size X students: 10 Students

1	Prerequisites for participation -
2	Learning outcomes 1. Students have the ability to explain and design corporate IT governance 2. Students have the ability to explain the IT governance evaluation process
3	Description This course aims to provide insight to students regarding the basic concepts of information technology governance and internal control that need to be considered in information technology governance. Students are expected to be able to understand the importance of alignment between information technology implementation goals and organizational goals and assess the risks that occur in information technology management. The use of standard frameworks that are commonly used by experts is also important for students to learn which can later be used as a reference in information technology management, as well as for research references in the field of Information Technology Governance and Information Systems and their use.
4	Teaching methods: Lectures, Group discussions
5	Assessment methods: Assignments, Mid-Term Exam, Final-Term Exam, Quiz
