

Name: Introduction to Industrial Sociology					
module/course code: IAB61003	Student workload: 510 Minutes/Week	Credits (ECTS): 4.53 ECTS	Semester 1	Frequency Odd Semester	Duration 1x / Semester
Types of courses: Tutorial/Lecture/Response		Contact hours: 150 minutes/week	Independent study 360 minutes/week	Class size X students: 30 Students	
1	Prerequisites for participation (if applicable) -				
2	<p>Learning outcomes</p> <ol style="list-style-type: none"> 1. Students are able to study and analyze the "world of work" in a group of industrial societies that lead to the digital world. 2. Students are able to analyze the internal structure of the industry and the role of individuals in that structure by using organizational theories as a link in the relationship between the analysis of industrial systems and work organizations. 3. Students are able to apply sociological theories in the implementation of organizational administrative processes, organizational governance, and as a basis for running a start-up business 				
3	<p>Description</p> <p>Industrial Sociology is a course in the Business Administration Study program which is designed to develop the ability of students to think and express ideas related to the development of society in the era of industrialization and digitalization. This course is designed to provide comprehensive and up-to-date knowledge of industrial developments to the digital era from a sociological perspective for business administration students. The learning method applied in this course is based on a student-centered paradigm that allows students to construct an understanding of industrial sociology based on experiential learning with a contextual approach.</p>
